- Easy to install.
- Hygienic.
- Minimal waste (cut your doors right out of the wall).
- Internal webbed design for optimal strength.
- Easy to clean.
- Etc.

www.norlock.ca

Norlock Planking was originally designed and developed in Germany.

The profiles are primarily used in livestock facilities for both interior walls and pen partitions. It is also an ideal product for meat processing plants, car wash, dog kennels, etc.

When standing a interior wall no studs or backing is needed, and our profile is durable to withstand extra weight and abuse.
